### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gagnon et al. (US Patent 6,540,201). Gagnon et al. teaches the basic method claimed as follows: securing a base strip (10) to a concrete floor (14) by double sided adhesive strips (16); placing forms (26) in brackets (12) on the base strip (10) and using the forms to make a tilt-up concrete panel (column 2, lines 7-35). Regarding claims 1, 6, 7, and 9, Gagnon et al. does not teach using release agent. Gagnon et al. does teach that the base strip (10) and brackets (12) are reusable, which implies that some form of release agent would be advantageous (column 3, lines 55-57). It is generally well known in the art to use release agent when the adhesive bond is intended to be temporary. It would have been obvious to a person of ordinary skill in the art to use well known methods, such as using release agent, to further define the method taught by Gagnon et al., particularly in view of the teachings of Gagnon et al. about reusing the various parts of the system.

### ***Response to Arguments***

3. Applicant's arguments filed March 10, 2008, with respect to the rejection(s) of claim(s) 1 and 6-9 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Gagnon et al.
